EXPECTATIONS OF BEHAVIOUR

Players are encouraged to cooperate and be respectful to each other irrelevant of circumstances. In short: Be respectful. We are fostering a friendly, fair play environment for everyone on our server.

Reporting Rulebreakers

Reporting players helps us with keeping a better quality of gameplay and experience for our players. Reporting a player can be done by using /report or going on # ⚡ support-ticket channel in our Discord server.

Reporting Bugs

Reporting server bugs¹ lets us improve your experience across the realms. Provide as much detail as possible when reporting bugs as to help our team understand the issue and fix it. Reporting bugs can be done through mail or by our Discord server's # 🐛 bug-reports forum channel. This will help other players avoid bugs until we are able to patch them up and will offer temporary solutions.

Player Safety

OKAMICraft players are responsible themselves for their own accounts and personal information. We are not responsible for any account and personal leaks. Keep your information safe and DO NOT SHARE IT. We recommend having 2FA² and strong passwords which include upper- and lower-case letters, numbers and special characters (e.g. !, @, #, &, %, \$, /). Also, be careful when clicking on links and make sure you're looking at official OKAMICraft socials³.

HOW TO REPORT RULEBREAKERS

To keep things fun and safe on our servers, we have rules which all players are expected to follow.

You can help us in this task by reporting players breaking these rules, so that we can take necessary action.

In-game reporting

Discord reporting

If you are unable to report a player through our in-game system, either because the player is no longer present or the reporting reason isn't listed, you can join our Discord server (<https://discord.com/channels/1174335863749091338/1174355193710784552>) and get a ticket in the # 🛠️ support-ticket channel. A member of our staff will help you shortly.

CONSEQUENCES

An offender's punishment and length of said punishment is determined by what rule/s were broken and their previous behaviour.

Good behaviour over a time can reduce the length and severity of future punishments.

Breaking of In-game Chat rules will tend to bring punishments which restrict chat privileges.

Breaking of Game Related rules will tend to result in a kick or timeout.

Breaking of the Threats rule can result in a ban without there being previous violations.
